This project was designed **to help people who are inside war zones.**

We do not want anyone to go through this experience, but to improve the lives of people who are stuck in these areas we created the **IHELP** application.

This way, people in these situations can use our app to distribute ads. You can post 3 different types of ads: request, offer and announcement.

- **Request ad** means that you need something (like medical supplies, food, even a baby stroller).
- **Offer ad** means that you have a surplus of items and you are willing to give away some of them.
- **Announcement ad** means that you want to do an announcement, in which to announce latest news or to say that an area is unsafe for civilians.

If you have any question on this App, contact us:
